This program is a collaborative effort among AARP North Carolina, the UNC School of Pharmacy, the UNC School of Medicine Program on Aging, and the Carolina Geriatric Education Center.

Learning Objectives: The participants will be able to:

1. Identify components of safe and effective medication use in older adults as well as medications that may be problematic in this population.
2. Work with older adults to ensure adherence to medications and help them maintain accurate records of their medications.
3. Access appropriate resources for assisting seniors with medication therapy management and prescription assistance needs.
4. Work with local community agencies and individuals to improve medication use and access for seniors.
